It works with 4 – 5 digits brokers and works with micro accounts. But it doesn't work with new NFA rules.

Test before using it with ECN brokers.

The EA is for daily/long term trading. Not short term trading/investing. Meaning : set it and forget it!

Trading in general is a RISKY business. No risk = no profit.

With very high winning rate, the large stop loss is totally safe. Nothing to worry about. But please feel free to test any other settings that would make you feel better!

Always demo trade before going live, and never trade with money that you can't afford to lose.

Start small and let the profits run, is always a good plan!

Thank you and have a great trading day,
